C#, .NET,

Objektorienterad programmering (OOP)

SQL, Design och hantering av relationsdatabaser

ASP.NET Web API, RESTful API

HTML5, CSS3, JavaScript (React basics).

Language

Engelska

Svenska

About Me

Family and friends would describe me as social, outgoing, and easygoing. I thrive in environments where collaboration leads to new ideas, and it is important to me that everyone feels like they have been part of the process. Coding is more than a hobby for me; it is something I have been interested in since I first held a computer. Outside of my studies, I enjoy taking long walks with my fiancée and dog, but on a warm day, you will find me bobbing among the waves in the sea.

Work Experience

Logistics & Process Optimization | 2019–2024 **Beslag & Design, Willab, Martin & Servera**

Optimization: Managed high-intensity workflows and identified bottlenecks to increase throughput in packing and picking processes.

System Proficiency: Experienced in handling various types of warehouse management systems.

Studier

Backend Developer – Cloud Specialization

Ongoing

Focus on scalable backend systems, database management, and cloud-based deployments (AWS/Azure). Selected Courses: Database Technology, Cloud Services (AWS), System Design, Agile Methodologies.

Electrical Engineering & IT (High School)

Graduated 2019 EL-Data Ängelholm

Fundamental studies in logic, algorithms, and programming structures.
